## Low Dworshak Reservoir water level closes Dent boat ramp

**WALLA WALLA, Wash.** – Increased water discharges from Dworshak Reservoir to accommodate seasonal snowmelt and precipitation runoff have lowered the water level in the reservoir enough to close the Dent boat ramp until further notice. Dent Campground remains open. The reservoir water level as of 11 a.m., April 22, was 1481 feet above sea level whereas the full Dworshak Reservoir level is 1600 feet above sea level. Presently Big Eddy has the only boat ramp in operation on the reservoir.

For updated water level and boat ramp information at Dworshak, call (800) 321-3198 or (208) 476-1255.

Corps officials advise boaters and other persons using waterways both in Dworshak Reservoir and below the dam on the Clearwater River to be alert to changes in water elevation and volume of flow during this time period. Always wear a Coast Guard approved personal flotation device.

For more information, please call the Public Affairs Office at (509) 527-7020.
